Notice to Vendors: Accreditation Applications Open for Electronic Fiscal Devices (EFDs) on the Vanuatu Sales Monitoring System

The Department of Customs and Inland Revenue invites both local and international vendors to submit applications for the accreditation of their Point of Sale (POS) and External Sales Data Controller (E-SDC) products. Accreditation is a mandatory requirement designed to ensure that all solutions comply with the established technical and administrative standards under the Vat Monitoring Regulation Order No.153 of 2025 prior to approval for use. The only products that have successfully undergone this accreditation process will be authorized for sale or deployment to taxpayers in Vanuatu.

Types of Accreditations

- **Transferable** – Vendors (developers, manufacturers, or resellers) may accredit products for sale to multiple taxpayers.
- **Non-transferable** – Taxpayers may accredit a POS or E-SDC solution for their exclusive use only.

Process

1. **Technical Review** – Conducted once for each product version.
2. **Administrative Review** – Required in each jurisdiction.

Upon successful completion, products become officially accredited and eligible for distribution.

We encourage all solution providers to come forward, accredit their products, and compete in the market the right way. Accreditation not only provides market access but also builds trust and ensures compliance with the Vanuatu Sales Monitoring System (VSMS) regulation.

Vendors can begin the process through the Developer Portal via this link <https://customsinlandrevenue.gov.vu/taxes-and-licensing/vsms.html#efd-accreditation> to start their accreditation.

For more information, do not hesitate to contact VSMS team on email: vsms@vanuatu.gov.vu

Harold TAROSA

Director of the Department of Customs and Inland Revenue
